

## PRODUCT COMPARISON CHART

# How is our Identity Verification solution different from others on the market?

The HID Identity Verification (IDV) service is offered as a Software As A Service+ (SaaS+). It can be easily implemented, instantly customized and is an end-to-end solution with real-time results.

### Less Cost, Less Risk, Better Outcomes

	SaaS+ 	SDK/API* Vendors	Web** Vendors
<b>SEAMLESS USER EXPERIENCE</b> An intuitive, seamless experience for the customer that results in higher quality data capture for the business			
<b>OPERATIONAL BENEFITS</b> A solution that is customised to your business needs, implemented in less time, with a lower total cost of ownership and real-time outcomes			
<b>ROBUST COMPLIANCE</b> Industry-leading document and database checks ensure that documents have not been forged or tampered with and your customer is who they say they are			
<b>TECHNICAL ARCHITECTURE</b> Pre-built, end-to-end architecture for all your customer onboarding use cases			

\* **API/SDK:** These solutions typically involve complex, costly and risky digital transformation projects.

\*\* **Web:** Easily implemented, but poor quality data capture and highly vulnerable to fraud.
