

HID® ArcID™ Store and Forward

Centralized Electronic Fingerprint Transmission (EFT) Record Management

HID Global's ArcID Store and Forward is designed for organizations processing applicant fingerprint submissions from multiple capture systems. As a central repository for Electronic Fingerprint Transmission (EFT) records, the solution centralizes EFT records from distributed enrollment systems for transmission to receiving agencies or backend systems, such as FINRA, OPM, CAS, JABS, and SEC and is optimized for large-scale enrollment system installations.

The solution is specifically designed to receive, validate, prepare and forward biometric and biographic data. ArcID Store and Forward utilizes secure communication protocols, such as HTTPS/SSL, SFTP and/or S/MIME encrypted messaging from enrollment systems to external or agency endpoints.

ArcID Store and Forward can also be configured to hold some or all EFT files before forwarding. The records can then be examined or modified further prior to sending to the receiving agency or designated external system. Additionally, ArcID Store and Forward allows users to save digital fingerprint cards which conform to receiving agency standards and create customized transaction reports.

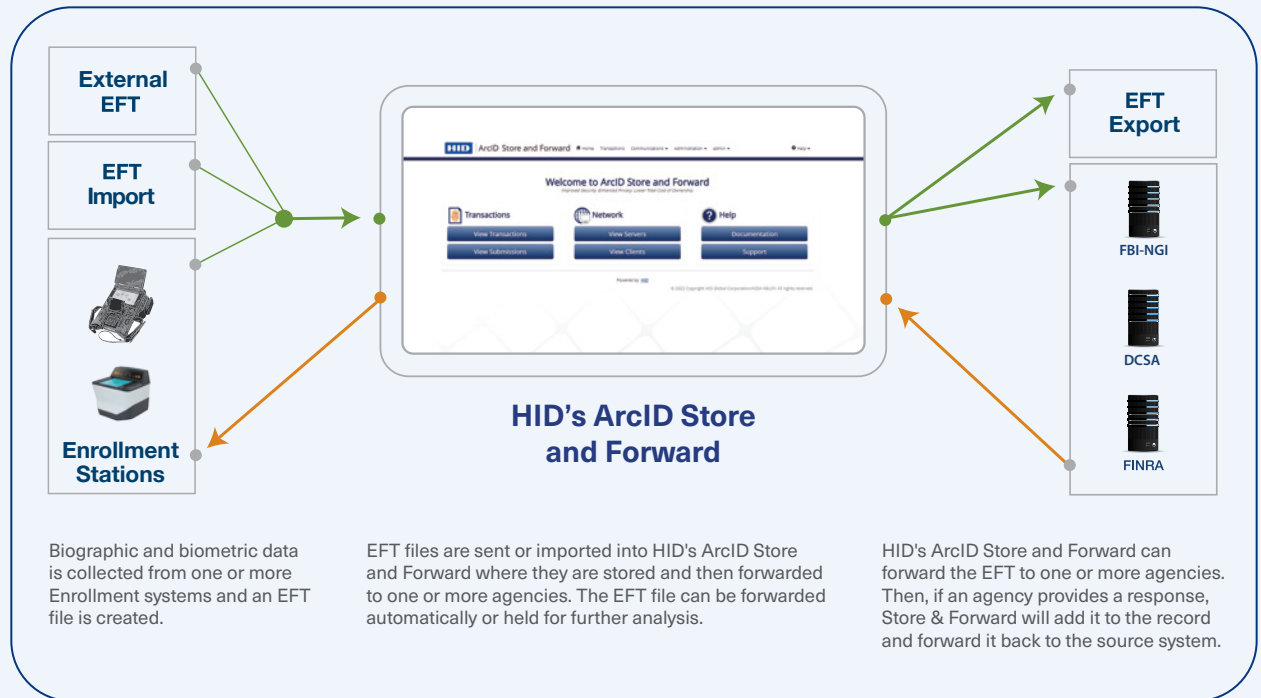

A scalable system that easily integrates into IT infrastructures — ArcID Store and Forward is the ideal solution for your organization. The integrated administration controls lend flexibility and security to a sensitive transmission process.

BENEFITS:

- Administration through the web for transaction visibility and control of submission process
- Centralized storage of EFT files from one or more enrollment systems
- Ability to programmatically hold/release submission based on user defined workflows
- Validate received EFT files against agency or state specifications
- Automatically remove meta data from EFT files before submissions
- Edit biographic data for corrections before sending to destination

	SPECIFICATIONS
Product Name	HID ArcID Store and Forward
Server SYSTEM Requirements	Windows Server 2016 or Windows Server 2019 Microsoft SQL Server 2016, 2017 or 2019 (Standard or Enterprise) IIS (Internet Information Services) 10 or later Active Directory compatible (SSO)
Client BROWSER Requirements	Microsoft Edge Browser (Chromium version - 79.0.309 or later) Google Chrome - Version 20 or later HID ArcID Store & Forward Server must be a trust site for the local domain or Internet policy
