

# DigitalPersona<sup>®</sup> for Panasonic Toughbook<sup>®</sup> Solutions

Security and Mobility

# Security + Mobility: A Perfect Match

Transform the way your mobile workforce accesses computing technology and the network while providing IT the peace-of-mind of integrated secure authentication. HID Global DigitalPersona® allows administrators to deploy and benefit from a composite authentication approach to secure access - going beyond passwords and traditional two-factor and multifactor methods.

DigitalPersona's advanced authentication capability is now an integrated option for Panasonic Toughbook. Whether it is the optimal set of authentication factors for fast and secure Windows Logon or a more complete enterprise security solution that is required, HID and Panasonic deliver the perfect secure mobile computing solution.

## **Finding the Right Balance in Your Mobile Authentication Strategy Doesn't Have to Be Hard**

Public safety agencies and utility companies need to secure mobile endpoints, applications and access to sensitive information - ensuring compliance with IT security protocols and regulatory mandates. At the same time, employees and contractors need convenient access options to dedicated or shared devices during their shift without delay or disruption.

Choose the right level of security required for your mobile use case. Transform your logon authentication protocol with DigitalPersona Logon for Windows and provide entirely new levels of protection utilizing composite authentication. Select DigitalPersona Premium and ensure a frictionless user experience across the entire enterprise and all applications (Windows Logon, web, cloud, on-premise and mobile apps). DigitalPersona delivers the strongest protection available in the industry.

## The FOUR PILLARS of Advanced Authentication

CLOSE EVERY GAP

COMPLETE COVERAGE

HUMAN PROOFED

RAPID ADAPTABILITY

Whether your authentication requirements are governed by CJIS, or you are simply reinforcing enterprise security protocols through password replacement and additional risk-based factors, DigitalPersona closes your compliance gaps.

Go beyond the traditional set of authentication factors with contextual risk-based factors of time, velocity, location and behavior\*.

DigitalPersona Premium offers secure access for your entire network and legacy, cloud and mobile applications and workflows. One solution addresses all your security needs without leaving any system or application exposed, or covered by a patchwork of hard to manage and maintain security products.

Eliminate the reliance and burden on users. Gone is the fear of compromise due to lack of user compliance.

Organizations can balance usability and protection based on specific security goals. IT administrators benefit from an easily deployed, managed and maintained solution that requires no proprietary tools or staff training.

Leverage your existing IT infrastructure and deploy more quickly than other solutions in the market today. Organizations are typically up and running in days - not weeks or months. And with DigitalPersona's extensible architecture, your solution is "future-proof."

## A Broad Array of Authentication Factors

DigitalPersona includes the factors to support basic “password plus” options with traditional one-time passwords (OTPs) and smartcards. And when you’re ready to move into more complex scenarios, an array of sophisticated biometric, behavioral and mobile-based factors are available to meet the convenience and security needs of your use case. Match your authentication factors to the optimal security posture for your organization.

### WHAT YOU KNOW

Password  
PIN  
Recovery  
Questions

### WHO YOU ARE

Fingerprint  
Face

### WHAT YOU HAVE

Smartcards  
and USBs  
Contactless Card
